A New Process for Preserve ing all Perishable Articles. Animal and Vegetable, from Fermentation and Putrefac-

"OZONE-Purified air, active state of oxygen."-Webster.

This Preservative is not a liquid, pickle, or any of the old and exploded processes, but is simply and purely OZONE, as produced and applied by an entirely new process. Orana is the natiseptic principle of every substance, and po senses the power to preserve animal and regatable structures from docay.

There is nothing on the face of the earth liable to spell or docay which the natiseptic principle of every substance, and po senses the power to preserve animal and regatable structures from docay.

There is nothing on the face of the earth liable to spell or docay which there is nothing on the face of the earth liable to spell or docay which there is no particularly the preserve for all time in a perfectly fresh and palatable condition.

The value of Orane as a natural preserves has been known to our ablenchmilta for year, but, until now no means of preducing it in a practical, inexpensive, and simple inames have been discovered.

Misroscopic observations prove that decay is due to section matter or minute records liad devel spine and dectory which is seen and dectory the preserves. At one offices in Checimastic enters is seen almost every article that can be thought of, preserved by this procest, and every visit of Orane as a preservative. We will also preserved by this procest, and every visit of Orane as a preservative. We will also preserved by this procest, and every visit of Orane as a preservative. We will also preserved by this opening and sink etc., preserved by this method, can be shipped to Europe, subjected to atmospheric changes and return by this country is a state of perfect preservation.

EGGs can be treated at a cost of less than one dollar a thought of the process of the control of the

FRUITS may be permitted to ripen in their native climate, and can be transported in any part of the world.

The juice expressed from fruits can be held for an indefinite period without formentall observed from specially asset for any length of time.

**With a Table KS* can be kept for an indefinite period in their natural condition, retaining their odor and flavor, treated in their original packages, at a small expense. All grains fleur, meal, edg, are held in their noriginal packages, at a small expense. All grains fleur, meal, edg, are held in their noriginal condition.

BUTKEL, after being treated before decomposition est in, can be held in a natural condition for weeks, without puncturing the skin of mutilating the bely in any way. Hence the grait value of Grone to undertakers.

There is no change in the slightest particular in the appearance of any article thus preserved, and no trace of any foreign ar unnatural odor or tasts.

The process is on imple that a child can operate it as well and successfully as a man. There is no expensive apparates or machinery required.

A room filled with different articles, such as eggs, most, fish, etc., can be treated at one time, without additional trouble or expense as in fact, there is no thing that Grone will not preserve. Think of everything you can that is liable to sour, decay, or spoil, and then remember that we governate that Grone will preserve it in exactly the condition you want it for any length of time. If you will remember this, it will ave asking questions as to whether these will preserve the or that articles—it will preserve anything and everything you can think of money, from filled to slogged a year, that he pleases. We desire to get a life preservative, and through him secure the business which over county each to produce.
